
(a) Input
(b) Features
(c) Classifier
(d) Protocol
baseline
18 dims
time, height, peak T,
area, percentiles
+ descriptors
3 dims
entropy
mean gradient
99th pct. gradient
gradient boosting
CatBoost
XGBoost
random forest
random split
frames shuffled
grouped CV
whole layers held out
forward chaining
train 1-k, test k+1 to k+10
(e) Decision
score to action
cost-sensitive threshold on out-of-fold scores
abstain on the least confident frames
